Drawings

1. The drawings are objected to because they are not clear and contain static and fig. 8 appears to be a photograph. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

2. The Amendment filed 11/10/2010 has been entered. Claims 41-49 have been canceled.
3. Claims 21-25, 27-31, 33, and 50-52 are allowed.

Art Unit: 3711

4. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

5. The following is an examiner's statement of reasons for allowance: A soap bubble blowing device, comprising a tube having apertures for air inflow, said tube having a wall with an outer surface provided with folds which form the outer surface including alternating protrusions and recesses, and further comprising a lid with a built-in nipple and a container for a composition, said tube being inserted into said lid with a gap between a wall of said lid and said tube.

6. Allen, Jr., Horton, Kaysen, Quinn, Jr. et al., and Thain teach bubble blowing devices comprising tubes and lids, with the tube being inserted into said lid, but fail to teach the limitations above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
